## Emergency Power

- **Researchers:**

Partitioning the society into different functional departments each with a team leader/senior researcher.

The collection of senior researchers form a tier of senior managers or senior researchers; one of whome forms the chief researcher/cheif scientists of the society.

The senior reseachers can assume power of team leader or chief researcher in absense of society leader (emergency power situation).

- **Projects:**

Presence of a program coordinator/project manager to oversee, analyse, follow up, audit projects and their progress. Responsible for completetion of each agreed upon project. Can assume position of senior researcher of a department as response to emergency power situation.

- **Members:**

Board/Society members and internal funders can contribute in response to emergency power situations; forming an ad hoc tier of "senior" researchers to fill power gap.
